

Becoming an eSmart School

Conversations around Cybersafety

A very important aspect of becoming an eSmart school, is engaging all members of our school community; families, students and the local community, about student wellbeing, including cyber-safety. What more effective way to engage families in these important conversations than to include families in the educating process.

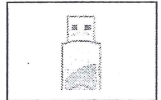

At Rangeview, we would like to invite families to share their cyber-safety advice with our community. From cyber-tips submitted, we'd like to include one or two entries in our school's weekly newsletter. Some entrants may also be featured in the Rangeview News!

Please submit your cyber-safety tip of 150 words or less in the form below and return to Ms Alex Box (eSmart Coordinator) or Mrs Karen Hastie (ICT Leader) or the school office.
